Graphite	231-955-3	NA	7782-42-5	>99	NA

Emergency overview:

Adverse health effects and symptoms:

Dark gray to black, fine, dry powder, odorless. Moderate irritant to the respiratory system and eyes; mild irritant to mucous membranes and skin. Symptoms of inhalation include coughing, shortness of breath, and production of black sputum. Chronic exposure may cause pneumoconiosis, fibrotic disease, or aggravate existing pulmonary disease.

Section 4. FIRST AID MEASURES

Eye Exposure:

Causes irritation. Irrigate eyes with water and repeat until pain free. Seek medical attention if irritation persists, or if visual changes occur.

Skin Exposure:	May cause skin irritation. In case of contact, wash with plenty of soap and water. Seek medical attention if irritation persists.
Inhalation:	May cause irritation, along with coughing and appearance of black sputum. If respiratory irritation or distress occurs, remove victim to fresh air. Seek medical attention if irritation persists.
Ingestion:	Overdose symptoms may include breathing difficulty and coughing up black sputum. If victim is conscious and alert, give 2-3 glasses of water or milk to drink. Do not induce vomiting. Seek immediate medical attention. Do not leave victim unattended. To prevent aspiration of swallowed product, lay victim on side with head lower than waist.
Medical conditions possibly aggravated by exposure:	Inhalation of product may aggravate existing chronic respiratory problems such as asthma, emphysema, or bronchitis. Skin contact may aggravate existing skin disease. Chronic overexposure may cause pneumoconiosis ("dusty lung" disease).

Section 5. FIRE-FIGHTING MEASURES

Flammable Properties:	Not flammable
Flash Point:	Not determined
Suitable Extinguishing Media:	CO2, water spray, dry chemical powder or foam
Hazardous Combustion Products:	May release CO or CO2.
<u>Explosion Data:</u>	
Sensitivity to Mechanical Impact:	Not sensitive
Sensitivity to Static Discharge:	Can conduct electricity or static charge
Unusual fire/explosion hazards:	Airborne dust could be explosive at high concentrations.
Protective Equipment and Precautions for Firefighters:	As in any fire, wear self-contained breathing apparatus pressure-demand. NIOSH (approved or equivalent) and full protective gear.

Section 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions:	Avoid contact with skin, eyes, and clothing. This is a slip hazard; do not walk through spilled material.
-----------------------	---

Personal Protective Equipment:	Graphite can become a combustible dust if allowed to become airborne. Wear PPE as specified in Section 8. Sweep up and containerize for disposal or reclamation. Vacuuming or wet sweeping is suggested to avoid dust dispersion.
Emergency Procedures:	Graphite can become a combustible dust if allowed to become airborne.
Methods for Containment:	Prevent further leakage or spillage if safe to do so. Material should be collected mechanically and disposed of in suitable containers.
Methods for Clean Up:	Avoid dust formation. Clean up released material using vacuum or wet sweep and shovel to minimize generation of dust. Bag and drum for disposal; properly label containers.
Environmental Precautions:	Prevent material from entering storm sewers or conveyances to waterways.
Other:	If product is contaminated, use PPE and containment appropriate to the nature of the most toxic chemical/material in the mixture.

Section 7. HANDLING AND STORAGE

Personal Precautions:	Use appropriate PPE when handling or maintaining equipment, and wash thoroughly after handling (see Section 8).
Conditions for Safe Storage/Handling:	Keep product in original container. Prevent falling. Do not allow near heat sources.
Incompatible Products:	Do not mix with other extinguishing agents. Store away from ignition sources and direct sunlight.
Hazardous Decomposition Products:	Carbon oxides, Potassium oxides
Hazardous Polymerization:	Will not occur

Section 8. EXPOSURE CONTROLS/PERSONAL PROTECTION

Chemical Name	OSHA PEL	ACGIH TLV	DFG MAK *	EU BLV
Graphite	15 mppcf	2 mg/m ³ (respirable)	4 mg/m ³ (inhalable)	NA

*German regulatory limits. mppcf = millions of particles per cubic foot. All values are 8 hour time weighted average concentrations.

Engineering Controls:

Showers
Eyewash stations
Ventilation systems

Personal Protective Equipment – PPE Code E:

The need for respiratory protection is not probable during short-term exposure. PPE use during production process must be independently evaluated.

Eye/Face Protection:
Skin and Body Protection:
Respiratory Protection:

Chemical goggles
Wear nitrile or similar gloves/coveralls
If exposure limits are exceeded or irritation is experienced, NIOSH approved respiratory protection should be worn. Use P100 respirators for limited exposure, use air-purifying respirator (APR) with high efficiency particulate air (HEPA) filters for prolonged exposure. Positive-pressure supplied air respirators may be required for high airborne contaminant concentrations. Respiratory protection must be provided in accordance with current safety and health requirements. The need for respiratory protection is not likely for short-term use in well ventilated areas. Good personal hygiene practice is essential, such as avoiding food, tobacco products, or other hand-to-mouth contact when handling. Wash thoroughly after handling.
