

**DUAL STANDARDS. GLOBAL CONFIDENCE.  
UNMATCHED PROTECTION.**

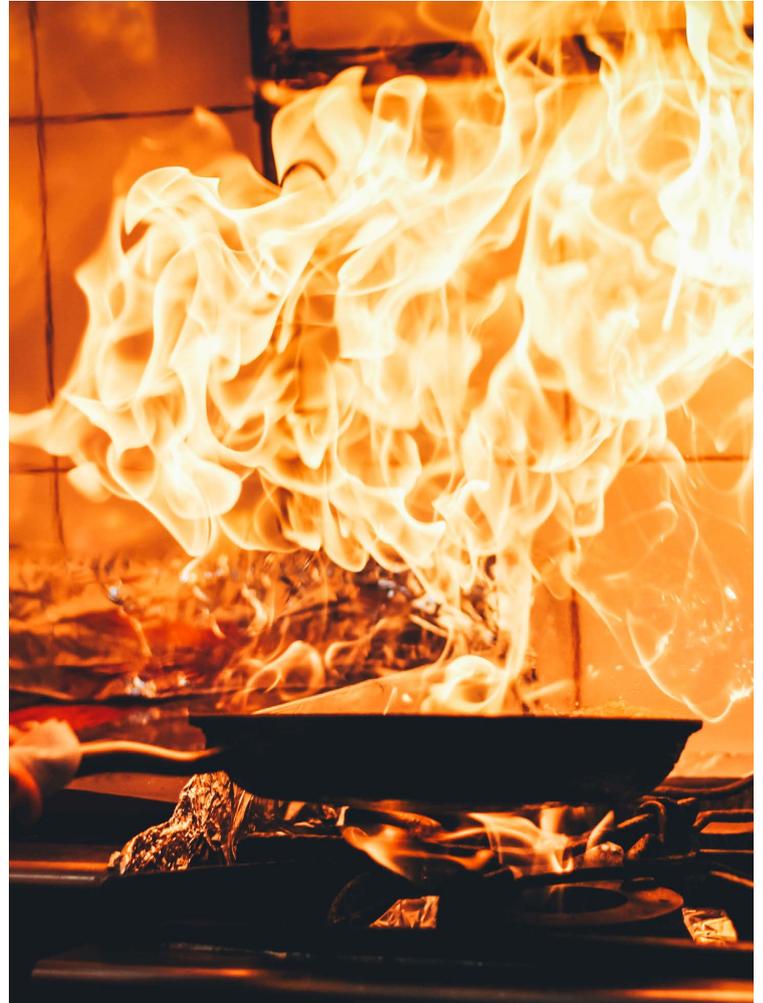

**Amerex KP Systems Now Certified to EN 17446**

 The Amerex Kitchen Protection (KP) systems are now certified to the EN 17446 European Standard—a major milestone in fire safety for commercial kitchens across Europe and beyond.

This certification reflects our commitment to rigorous testing, engineering excellence, and global compliance. EN 17446 sets the benchmark for fire suppression systems in commercial kitchens across 34 European countries, requiring extensive third-party testing on real-world cooking appliances like fryers, griddles, charbroilers, and range tops.

Amerex KP systems passed these tests with flying colors—demonstrating reliable performance in scenarios involving delayed activation, reignition, and high-heat conditions.

## **UL 300 + EN 17446 = TOTAL COVERAGE**

Amerex KP systems have long been certified to UL 300, the North American standard trusted by leading restaurant chains worldwide. Now, with EN 17446 certification, our systems offer dual compliance—giving you peace of mind whether you're operating in the U.S., Europe, or globally.

**Our MRM, PRM, and STRIKE systems meet both standards, ensuring:**

- Reliable suppression across a wide range of cooking equipment
- Fast, effective response to grease fires and high-temperature flare-ups
- Flexible installation for single or dual hood configurations

**DUAL STANDARDS. GLOBAL CONFIDENCE.  
UNMATCHED PROTECTION.**

## STRIKE: Smart Suppression Made Simple

The STRIKE Electronic Control System enhances KP performance with:

- Plug-and-play installation
- Reduced grease buildup
- Downloadable event logs
- Dual hood support

**STRIKE makes kitchen safety smarter, cleaner,  
and easier to manage.**

## Why It Matters

Whether you're designing a new kitchen or upgrading an existing one, choosing Amerex means choosing:

- Global compliance
- Trusted performance
- Innovative technology
- Peace of mind
