Section 3. COMPOSITION/INFORMATION ON INGREDIENTS

The precise composition of this mixture is proprietary information.

A more complete disclosure will be provided to a physician or other competent authority in the event of a medical emergency. All components are registered in the Chemical Abstract Service (CAS).

All Sections exhibit information for the chemicals involved

Chemical Name	EC No.	REACH Reg. No.	CAS-No.	Weight %
1,1,1,2,3,3,3-Heptafluoropropane	207-079-2	NA	431-89-0	65 - 97

NOTE: The concentration ranges exhibited above include the actual concentrations of the chemicals in the mixture; however, actual concentrations are withheld as a trade secret.

Adverse Health Effects and Symptoms:

Possible serious irritant to the eyes; mild irritant to the skin. Ingestion, though unlikely, may cause gastrointestinal irritation and edema (fluid retention).

Section 4. FIRST AID MEASURES

Eye Exposure:	Causes serious eye irritation. Irrigate eyes with water and repeat until pain free. Seek medical attention if irritation develops, or if vision changes occur. Liquid or cold gas can cause freezing injury to eyes. Flush eyes with cool water for 15 minutes. Seek medical attention immediately.
Skin Exposure:	Causes skin irritation. In case of contact, wash with plenty of soap and water. Seek medical attention if irritation persists. May cause cold burns or frostbite. Remove contaminated clothing and flush affected areas with lukewarm (NOT HOT) water. Seek medical attention immediately if blistering of the dermal surface or if deep tissue freezing occurs
Inhalation:	May cause coughing. If respiratory irritation or distress occurs, remove victim to fresh air. Seek medical attention if problems persists.
Ingestion:	Overdose symptoms may include thirst, nausea, and severe diarrhea and vomiting. If victim is conscious and alert, give 2-3 glasses of water to drink. If conscious, do not induce vomiting. Seek immediate medical attention. Do not leave victim unattended. To prevent aspiration of swallowed product, lay victim on side with head lower than waist.
Medical Conditions Possibly Aggravated by Exposure:	None

Section 5. FIRE-FIGHTING MEASURES

Flammable Properties:	Not flammable
Flash Point:	Not determined
Suitable Extinguishing Media:	Non-combustible. Cool fire-exposed cylinders until flames are extinguished. Damaged cylinders should be handled only by specialists.
Hazardous Combustion Products:	Carbon oxides (including CO ₂ and CO).
<u>Explosion Data:</u>	
Sensitivity to Mechanical Impact:	Not sensitive
Sensitivity to Static Discharge:	Not sensitive
Unusual Fire/Explosion Hazards:	In a fire this material may decompose, releasing oxides of carbon, potassium and nitrogen (see

Section 10). Cylinders could rupture under heat of fire.

Protective Equipment and

Precautions for Firefighters:

As in any fire, wear self-contained breathing apparatus pressure-demand, MSHA/NIOSH (approved or equivalent) and full protective gear.

Section 6. ACCIDENTAL RELEASE MEASURES

Personal Precautions:

Evacuate personnel to safe areas. Avoid contact with skin and eyes. Ensure adequate ventilation, especially in confined areas; monitor oxygen level.

Personal Protective Equipment:

None unless there is a chance of direct contact with the chemical. Wear self-contained breathing apparatus when entering area unless atmosphere is proved safe. Wear appropriate PPE for the situation.

Emergency Procedures:

Handle in accordance with good health and safety practices.

Methods for Containment:

Stop the flow of gas or remove cylinder to outdoor location if this can be done without risk. If leak is in container or container valve, contact the appropriate emergency telephone number in Section 1 or call your closest supplier location.

Methods for Clean Up:

Return cylinder to authorized distributor.

Environmental Precautions:

Prevent spreading of vapors through sewers, ventilation systems and confined areas.

Other:

If product is contaminated, use PPE and containment appropriate to the nature of the most toxic chemical/material in the mixture.

Section 7. HANDLING AND STORAGE

Personal Precautions:

Put on appropriate personal protective equipment. Contains gas under pressure. Do not get in eyes or on skin or clothing. Avoid breathing gas. Empty containers retain product residue and can be hazardous. Do not puncture or incinerate container. Close valve after each use and when empty.

Conditions for Safe Storage/Handling:

If pressurized – Protect from sunlight and store in a well-ventilated place. Protect cylinders from physical

damage; do not drag, roll, slide, or drop. Use a

suitable hand truck for cylinder movement. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas.

Incompatible Products:

Do not mix with other extinguishing agents, Incompatible with strong oxidizing agents and strong acids. Do not store in high humidity.

Hazardous Decomposition Products:

Carbon and sodium oxides.

Hazardous Polymerization:

Will not occur.

Eye/Face Protection:

Tightly fitting chemical goggles

Skin and Body Protection:

Wear protective gloves/coveralls

Respiratory Protection:

Positive-pressure supplied air respirators may be required for high airborne concentrations. Respiratory protection must be provided in accordance with current safety and health requirements. The need for

Hygiene Measures:

respiratory protection is not likely for short-term use in well ventilated areas.

Good personal hygiene practice is essential, such as avoiding food, tobacco products, or other hand-to-mouth contact when handling. Wash thoroughly after handling.
